October 22-December 3, Tuesdays 3:15 and 50% Online
Dr. Joel Fredell

Fundamentals of Web Design with Dreamweaver

- ◇ Basic to intermediate HTML, CSS, and jquery
- ◇ Coding for cross-platform viewing
- ◇ Dreamweaver shortcuts and tricks
- ◇ Usability testing
- ◇ Website hosting and publishing
- ◇ Search Engine Optimization

This course introduces students to Adobe Dreamweaver, and industry-leading software for designing websites. The class is divided into project-based units focused on increasing levels of web design, from building a simple homepage to creating complex interactive page designs and sites to enabling a responsive template for mobile and tablet viewing.

Mac laptops loaded with Adobe Creative Cloud software will be provided to enrolled students.
