Introduction

The first Strategic Priority for Southeastern is “To engage a diverse population of undergraduate and graduate learners with powerful experiences.” In order to better understand the reasons why students leave Southeastern, Institutional Research conducted the Non-Returning Student Survey, a phone survey of Fall 2020 students, who were not enrolled in Spring 2021. This report details the results of the Non-Returning Student Survey.

Method

Participants

The Southeastern Office of the Registrar provided a list of degree-seeking students 18 and older who were enrolled in Fall 2020 and were not enrolled in Spring 2021. Students who were suspended, owed money, or had other holds hindering enrollment were excluded. IR ran the list against the National Student Clearinghouse and excluded those students who were identified as enrolled in a different institution. The population for this study was the 545 students who met the previous criteria. The survey yielded a contact rate of 54.7% and a response rate of 55.6%.

Procedure

The Office of Institutional Research worked with Enrollment Services to identify students to conduct the phone survey. These students were trained and supervised by Institutional Research staff.

Instrument

The survey first asked a series of questions to determine if students planned on returning to Southeastern in the future, and if they had intended to obtain a degree when they began at Southeastern. Respondents who indicated they did not plan on returning to Southeastern were given a list of possible reasons why a student might leave college, and were asked to rate whether it was a major reason, a minor reason, or not a reason at all in their decision to leave Southeastern. Students who indicated that they did plan to continue their education at Southeastern were first asked when they planned to return to Southeastern. They were then given a list of possible reasons why a student might stop attending Southeastern for a while, and were asked to rate whether each item was a major reason, a minor reason, or not a reason at all in their decision to “stop-out.” The final section asked for demographic information that is not collected as a part of the application or registration process, such as the number of children a student has and how far they have to travel to campus.

Results

The first set of questions was to determine whether students were: 1) Drop-Outs, those students who no longer plan to continue their education at Southeastern, including those who plan on or have transferred elsewhere; 2) Stop-outs, those students who plan to return to Southeastern at some point. Based on these definitions, 48.8% (n=79) of the respondents were Drop-Outs and 51.2% (n=83) were Stop-outs.

Stop Outs

The majority of the Stop-outs (54.2%, n=45) planned on returning to Southeastern in Fall 2021, while 25.3% (n=21) planned on returning to Southeastern within the next year. Four percent (n=3) plan on returning within the next two years and 12% (n=10) are not sure when they will return. As of April 21, eleven (24.4%) of the respondents planning on returning in Fall 2021 had enrolled.

Next, Stop-outs were asked to indicate whether each of seventeen possible reasons was a Major Reason, a Minor Reason, or Not a Reason for their decision to stop attending Southeastern for a while. "Needed a break from school" was the item with the largest endorsement, with 36% of respondents indicating it was a major reason and 24% indicating it was a minor reason they stopped attending Southeastern. This was followed by "Needed to earn more money" which resulted in 30% citing the statement as a major reason and 18% citing a minor reason.

Table 2 provides the percentage of endorsement for Major Reason, Minor Reason, and Not a Reason for each item.

Table 2
Stop-Out Reasons

	Major Reason	Minor Reason	Not a Reason
Needed a break from school	36.1%	24.1%	28.9%
Needed to earn more money	30.1%	18.1%	41.0%

Respondents were then asked what was the main reason they decided to attend another school. A variety of reasons were cited, all the responses can be found in Appendix A.

Next, Drop-outs were asked to indicate whether each of forty-eight possible reasons was a Major Reason, a Minor Reason, or Not a Reason for their decision to leave Southeastern. “Decided to attend a different college” was the item with the largest endorsement, with 38.0% of respondents indicating it was a major reason they left Southeastern. This was followed by “Too much stress” (24.1%) and “Too much conflict between the responsibilities for work and school” (25.3%).

Table 4 provides the percentage of endorsement for Major Reason, Minor Reason, and Not a Reason for each item.

Unexpected Expenses

Those students who indicated unexpected educational expenses was a reason for dropping out were asked what type of expenses they encountered. A total of thirteen students provided expenses, 30.8% (4) indicated tuition, 23.1% (3) indicated fees and additional 23.1% indicated living expenses, 15.4% (2) indicated textbooks that were not included in the rental fee. All responses can be found in Appendix B.

Difficult Course(s)

Students were asked if they had problems with any particular course. Sixty-two respondents (38.3%) identified a particular course or courses with which they had problems. Math was the most commonly cited course, with 20 respondents (36.4%) indicating a particular math course or just math in general. All courses and any comments made about them can be found in Appendix C.

Demographics of Drop-Outs and Stop-Outs

The last portion of the survey asked participants for demographic information that is not readily available as part of the student record system. Answers to these questions help give a better understanding as to what type of student will leave Southeastern either temporarily or permanently. The vast majority of students (79.6%) have never been married, and do not have children (77.2%). A majority (21.6%) of the respondents traveled more than 30 miles (one way) to Southeastern's main campus, while 11.1% lived on campus. Over half (64.2%) of the respondents worked off campus. An additional 10.5% worked on campus. Forty-three percent of those who worked, spent more than 30 hours a week working, with an additional 28.9% spending 21-30 hours a week working. Nineteen percent of the respondents are first-generation college students, which according to Terenzini et al (1996) is a student who has no parent with any college or university experience. Thirty-two percent of the students have at least one parent with a baccalaureate degree and an additional 12.0% have at least one parent with a graduate degree.
